

GENETIC VS. GENOMIC

THEY SOUND SIMILAR, BUT THE PROSTATE CANCER QUESTIONS THEY ANSWER ARE VERY DIFFERENT.

GENETIC

What does my family history of prostate cancer mean?

Am I at higher risk of developing prostate and other cancers?

Are there additional screening options I can discuss with my doctor?

How can I tell if I'm *BRCA1* or *BRCA2* positive?

GENOMIC

How aggressive is my prostate cancer?

What treatment options are appropriate for me?

What treatment intensity is appropriate for me?

Am I eligible for the Oncotype DX® test?

What could the difference mean for you?
